

SARBASIDDHI CONSULTANTS

AND

BUILDERS PVT. LTD.

Tillottama -15, Rupandehi

“Design. Optimize. Empower Industries.”

Established in 2077 B.S.

Sarbasiddhi Consultants and Builders Pvt. Ltd. is a specialized **Engineering Design, MEP Consultancy, Industrial Vastu Advisory, Energy Audit, and Industrial Consulting Firm.**

We provide complete technical design and consultancy solutions.

We do NOT undertake construction or contracting work.

Executive Director: Er. Saroj Shah

Contact number: - +9779857016559

MBA (2016) / Industrial Engineer (2011)

1. Company Overview

Sarbasiddhi Consultants and Builders Pvt. Ltd. is a multi-disciplinary engineering and industrial consulting company providing complete technical solutions for industrial setup, engineering design, MEP systems, automation, quality systems, productivity enhancement, maintenance, and operational excellence.

We support industries from the initial planning phase to design, installation, commissioning, optimization, and long-term maintenance.

Our goal is to help businesses build efficient, profitable, and technically strong industries by implementing modern engineering systems and industrial best practices.

Our strength lies in combining engineering expertise with practical field experience to deliver complete turnkey solutions from concept to commissioning.

2. Vision

To become Nepal's leading industrial engineering and consultancy company, known for technical excellence, innovative solutions, and sustainable industrial development.

3. Mission

- To provide accurate, efficient, and cost-effective engineering solutions.
- To integrate design, engineering, and execution under one platform.
- To enhance industrial productivity through technical optimization and energy efficiency.
- To deliver projects with quality, safety, and timely completion.

4. Core Services

A. Engineering Design Services (2D & 3D)

We provide complete engineering design and drafting services that help clients visualize and execute their projects effectively.

Our design services include:

- Factory layout design
- Machinery placement design
- Production line flow planning
- Electrical layout
- Plumbing layout
- HVAC layout
- Firefighting layout
- Structural drawings
- Architectural drawings
- Utility system layout
- Civil coordination drawings

Benefits:

- Better space utilization
- Smooth production flow
- Lower future modification cost
- Higher operational efficiency

Software Expertise: - AutoCAD - SketchUp - Revit - 3Ds Max - Lumion - ETABS (for structural coordination)

B. Civil Engineering Design Services (Consultancy Only)

We provide complete civil engineering design and consultancy services. **We do not undertake construction or contracting work.**

Scope of Civil Design:

- Residential building structural design
- Commercial building structural design
- Industrial building structural design
- Factory sheds (PEB & conventional steel structure design coordination)
- Warehouse structural planning
- Industrial foundations design
- Heavy machinery foundation design
- RCC structure design
- Structural analysis and detailing

Services Include:

- Structural design calculation
- Structural drawing preparation
- Foundation design & analysis
- Column-beam-slab design
- Footing design
- Structural stability review
- Quantity estimation from structural drawings
- Design consultancy & technical supervision support

Benefits:

- Safe construction
- Proper load distribution
- Long life structure
- Cost optimized design

C. Architectural Design Services

Our architectural team provides functional, aesthetic, and Vastu-aligned designs.

Services Include:

- Master planning
- Building concept development
- Interior planning
- Exterior elevation
- Space optimization
- Industrial office planning
- Vastu-based architectural planning

Benefits:

- Better workflow
- Attractive design
- Functional spaces
- Maximum land utilization

We focus on maximum space utilization, ventilation, natural lighting, and cost efficiency.

D. MEP Consultancy (Mechanical, Electrical & Plumbing)

MEP is the heart of industrial operations. We provide complete Mechanical, Electrical, and Plumbing (MEP) solutions for residential, commercial, and industrial projects.

Mechanical Services:

- HVAC system design
- Ventilation systems
- Industrial exhaust systems
- Compressed air line layout
- Boiler and utility layout planning

Electrical Services:

- Electrical load calculation
- Single line diagram (SLD)
- Panel board design
- Transformer and DG sizing
- Industrial wiring layout
- Lighting design
- Earthing and lightning protection system

Plumbing Services:

- Water supply system design
- Drainage system design
- Firefighting system design
- Industrial piping layout
- STP and ETP planning

Benefits:

- Efficient utility system
- Lower maintenance cost
- Better safety
- Energy saving

E. Complete Industrial Setup Solutions

We provide complete setup solutions from zero to production.

Our scope includes:

- Feasibility study
- Plant layout
- Machinery planning
- Utility setup

- Installation support
- Production line balancing
- Trial production
- Commissioning support

Benefits:

- Faster project completion
- Proper technical setup
- Lower operational issues
- Better future scalability

F. Industrial Automation & Productivity Improvement

Modern industries need automation to survive.

We help in:

- Production automation
- PLC system integration
- Conveyor automation
- Sensor-based controls
- Process standardization
- Line balancing
- Cycle time reduction
- Labor optimization

Benefits:

- Increased productivity
- Reduced manpower cost
- Lower human error
- Faster production

G. Quality, Compliance & Industrial Performance Systems

This is one of our strongest service areas.

We help industries implement:

HACCP (Hazard Analysis and Critical Control Points)

A food safety management system that identifies and controls food-related hazards.

Benefits:

- Safe food production
- Better export opportunities
- Consumer trust

GMP (Good Manufacturing Practices)

A system that ensures products are consistently produced and controlled according to quality standards.

Benefits:

- Better product quality
- Reduced contamination
- Improved process discipline

EHS (Environment, Health and Safety)

A system to maintain workplace safety, employee health, and environmental compliance.

Benefits:

- Fewer accidents
- Legal compliance
- Better working environment

CAPEX (Capital Expenditure Planning)

Planning for machinery investment, infrastructure, and industrial expansion.

Benefits:

- Better investment planning
- Cost control
- Future expansion readiness

OEE (Overall Equipment Effectiveness)

Measures machine efficiency based on Availability × Performance × Quality.

Benefits:

- Higher machine efficiency
- Lower downtime
- Better production output

Yield Improvement

Yield means how much final good product is produced compared to raw materials used.

Benefits:

- Lower wastage
- Better profit margin
- Better material utilization

Downtime Reduction

Downtime means machine stop time.

We analyze:

- Why machines stop
- How often they stop
- How to reduce stoppages

Benefits:

- More production time
- Higher profitability
- Better delivery performance

H. Annual Maintenance Contract (AMC)

AMC = Annual Maintenance Contract

We provide long-term maintenance support.

Industries:

- Hotels
- Hospitals
- Food industries
- Factories
- Commercial buildings

Scope:

- Preventive maintenance
- Breakdown maintenance
- Electrical maintenance
- Mechanical maintenance
- HVAC maintenance
- Utility maintenance

Benefits:

- Lower breakdown risk
- Longer machine life
- Lower maintenance cost

I. Energy Audit & Cost Reduction

We identify where energy is wasted.

Services:

- Load study
- Power factor study

- Transformer analysis
- Air leakage analysis
- HVAC efficiency study
- Lighting optimization

Benefits:

- Reduced electricity bill
- Better machine performance
- Energy savings

J. BOQ, Estimation & Costing

BOQ = Bill of Quantities

We prepare:

- Material quantity
- Labor costing
- Rate analysis
- Budget estimation
- Tender costing

Benefits:

- Accurate budgeting
- Better cost control
- Avoid unexpected expenses

K. Industrial Consulting & Business Optimization

We provide strategic consulting in:

- Plant expansion
- Process improvement

- Productivity enhancement
- Cost reduction
- Quality improvement
- Waste reduction
- New project feasibility

Benefits:

- Higher profits
- Better systems
- Sustainable growth

L. Industrial Vastu Consultancy with Detailed Report

We provide professional Industrial Vastu analysis to enhance productivity, energy flow, and operational efficiency.

Services Include:

- Factory layout Vastu analysis
- Machinery placement recommendation
- Office cabin positioning
- Raw material storage planning
- Finished goods storage alignment
- Boiler and transformer placement guidance
- Entrance and directional analysis

Deliverables:

- Detailed written Vastu report

- Layout correction suggestions
- Energy flow analysis
- Practical modification recommendations
- Implementation guidance

Our approach integrates traditional Vastu principles with modern industrial engineering practices.

5. Our Work Process

1. Client requirement understanding
2. Site inspection
3. Technical study
4. Design development
5. Costing and BOQ
6. Installation planning
7. Commissioning support
8. Performance improvement
9. AMC support

6. Why Choose Us

- **Integrated Engineering Solutions** – We provide complete engineering, industrial setup, automation, maintenance, and consulting solutions under one platform, reducing coordination challenges and saving time.
- **Strong Industrial Expertise** – Backed by years of practical experience in manufacturing, production systems, and industrial operations across multiple sectors.
- **Practical Industrial Experience** – Real-world exposure in handling factory setup, process optimization, production management, and large workforce operations.
- **Complete Engineering Solutions** – From concept development, design, costing, installation support, commissioning, and performance improvement to AMC services.
- **Technical Precision & Accuracy** – We focus on technically sound, accurate, and practical solutions that ensure long-term reliability and performance.

- **Accurate Costing & Budget Control** – Detailed BOQ preparation, estimation, and cost analysis help clients control budgets and avoid unnecessary expenses.
- **Strong Maintenance Expertise** – We provide preventive, corrective, and breakdown maintenance systems to improve machine reliability and reduce operational risk.
- **Productivity-Focused Approach** – Our services are designed to increase production efficiency, improve workflow, and maximize operational output.
- **Cost Reduction Expertise** – We identify hidden losses, reduce wastage, improve yield, and implement low-cost production strategies to increase profitability.
- **Energy Efficient Design Approach** – We optimize energy consumption through proper utility planning, audits, and efficient engineering practices.
- **Food Safety & Compliance Knowledge** – Expertise in HACCP (Hazard Analysis and Critical Control Points), GMP (Good Manufacturing Practices), and EHS (Environment, Health & Safety) implementation.
- **Strong Industrial Automation Experience** – We help industries integrate automation systems for better control, lower manpower dependency, and higher production efficiency.
- **Practical & Implementable Recommendations** – Our solutions are not only theoretical but designed for practical execution and measurable results.
- **Professional Reporting & Documentation** – We deliver clear technical reports, audit reports, costing reports, and implementation documents for better decision-making.
- **Customized Solutions for Every Industry** – Every industry is different; we provide tailored solutions based on specific operational needs.
- **Commitment to Quality, Safety & Timely Delivery** – We prioritize quality, workplace safety, compliance, and on-time completion in every project.

7. Commitment to Quality & Safety

We follow industry standards, safety protocols, and engineering best practices to ensure durable, efficient, and compliant infrastructure development.

8. Director Profile

Er. Saroj Shah

MBA /Industrial Engineer / Industrial & Energy Consultant

Er. Saroj Shah is a highly experienced engineering professional with more than a decade of expertise in industrial operations, manufacturing systems, process optimization, MEP coordination, and energy efficiency improvement.

Core Expertise:

- Industrial Plant Layout Optimization
- Structural & Civil Design Coordination
- MEP System Planning & Industrial Utilities
- BOQ Preparation & Cost Engineering
- Energy Audit & Power Optimization
- Industrial Vastu with Practical Implementation
- Manufacturing Process Improvement
- Automation Planning & Productivity Enhancement

With strong analytical capability and practical field exposure, he integrates engineering precision with cost efficiency to deliver technically sound and financially viable solutions.

9. Major Projects & Clients

We have successfully contributed to various industrial, commercial, hospitality, manufacturing, and institutional projects including:

- Patanjali Nepal Plant – Rohini 4, Semrahawa
- Brij Glass Industries Pvt. Ltd.
- Quick Food Industries Pvt. Ltd.
- Buddha Star Hotel
- NG Shopping Complex

- NG Furniture
- NG Agro Firm
- Hotel Fountain Fun
- Paschim Pahuni School
- Nasib Garment
- Rupandehi Agro Firm
- SR Complex (Devkota Chauk)
- Pathibhara Udyog (Hetauda)
- Tiger Forest Resort
- Jagdamba Alcohol Beverage (Hakui, Ramgram-16)
- Agrivastu Cold Storage (Taulihawa)
- Nasib Knitting & Textiles Pvt. Ltd.
- And many more successful projects.

Our involvement includes engineering design, MEP consultancy, industrial layout planning, BOQ preparation, costing analysis, energy optimization, and technical advisory services.
